DRAFT Southern California Association of Governments Catalog of Transportation Demand Management (TDM) GHG Reduction Policy Options

A catalog of state-level, greenhouse gas (GHG)–reducing actions and policy options based on actions undertaken or considered in state-wide climate change action plans by multi-stakeholder groups in a wide cross-section of U.S. states and by state, local, and private participants.

Key to Nominal Rankings of Options in the Tables That Follow:

| Potential GHG Emission Reductions ¹ | Potential Cost or Cost Savings ^{1, 2} |
|---|---|
| High (H): At least 1.0 million metric tons (MMt) carbon dioxide equivalent (CO ₂ e) per year by 2030 | High (H): \$100 per metric ton CO ₂ e (tCO ₂ e) or above |
| Medium (M): From 0.1 to 1.0 MMtCO ₂ e per year by 2030 | Medium (M): \$0 to \$100/tCO ₂ e |
| Low (L): Less than 0.1 MMtCO ₂ e per year by 2030 | Low (L): Less than \$0/tCO ₂ e |
| Uncertain (U): Insufficient information to estimate at this time | Uncertain (U): Insufficient information to estimate at this time |
| ¹ Several measures may overlap in terms of emissions reductions and/or cost impacts. “Stand-Alone” estimates provide values for measures that would be implemented independently of other measures, before accounting for potential overlap or synergies | |
| ² Costs are denoted by a positive number. Cost savings (i.e., “negative costs”) are denoted by a negative number. | |

Definition of “Priorities for Analysis”:

- **High:** High-priority options will be analyzed first.
- **Medium:** Medium-priority options will be analyzed next, time and resources permitting.
- **Low:** Low-priority options will be analyzed last, time and resources permitting.

Important Note: The state actions are numbered in this catalog solely for convenience in referencing them. Their numbers do NOT reflect a ranking or prioritization of the actions.

Transportation Demand Management (TDM)

Note that this listing will be developed more fully during the TDM TWG process. TWG members are encouraged to provide input on policies and programs currently in place to assist in defining baseline conditions. The “Notes” column may be used to record recently enacted policies and programs.
